

## Coronavirus Disease 2019 (COVID-19)

# When and How to Wear a Mask

## Recommendations for the General Public

Wearing a mask can help to prevent the spread of some respiratory illnesses, but it can also become a source of infection if not worn or discarded properly. If you need to wear a mask, you should also be sure to clean your hands frequently with soap and water or alcohol-based hand sanitizer.

### Wear a mask if:

- You have symptoms of COVID-19 (i.e., fever, cough, difficulty breathing, sore throat, runny nose or sneezing) and are around other people.
- You are caring for someone who has COVID-19.
- Unless you have symptoms of COVID-19, there is no clear evidence that wearing a mask will protect you from the virus, however wearing a mask may help protect others around you if you are sick.

### How to wear a mask:

- Before putting on your mask, wash your hands with soap and water for at least 15 seconds or use alcohol-based hand sanitizer.
- Secure the elastic loops of the mask around your ears. If your mask has strings, tie them securely behind your head.
- Cover your mouth and nose with the mask and make sure there are no gaps between your face and the mask.
- Do not touch the front of the mask while you wear it. Wash your hands with soap and water for at least 15 seconds or use alcohol-based hand sanitizer if you accidentally touch your mask.

### How to throw away your mask:

- Do not touch the front of your mask to remove it.
- Remove the elastic loops of the mask from around your ears or untie the strings from behind your head.
- Hold only the loops or strings and place the mask in a garbage bin with a lid.
- Wash your hands with soap and water for at least 15 seconds or use alcohol-based hand sanitizer after you have discarded your mask.

### More information about masks:

- When a mask becomes damp or humid, replace it with a new mask.
- Do not reuse a single-use mask. Discard your mask when you have finished using it.
